

AT&T PARTNER II R4.1 CONTROL UNIT (6050-PRO41) Introduced to the Partner family (August 1996)

Maximum system configurations: 16 outside lines x 48 station, 24 outside lines x 24 stations

The Partner II was based on Motorola's 68000 microprocessor. The Partner II processor included a jack for paging, SMDR, an RCA jack for music on hold input and an amphenol connector to an expansion processor. Partner II allows the use of up to two 5-slot carrier for greater expansion, supporting several modules adding line and station ports. The Partner II is equipped 0x0 but can expand up to 24x24 or 16 x 48 (lines x stations.). The Partner II does have CALLER ID capabilities (R3.0 or higher).
