

AVAYA PARTNER MESSAGING RELEASE 7.0 (700323207) May 2004

PARTNER Messaging, available in a 2-, 4-, or 6-port configuration, is an embedded voice messaging system housed in a module (circuit pack) that plugs into the Partner system carrier (occupies 1 slot in a carrier). It replaces the Partner Mail VS system, and adds substantial additional features. Partner Messaging supports 3 languages, two of which can be active. The disk has 100 hours of recording capacity, and supports up to 200 mailboxes, with up to 120 messages, 180 minutes per mailbox, administrable on a per mailbox basis. Users can record their personal phone calls using Record-a-Call up to 60 minutes in length. There are 4 Auto Attendants, and Day/Night mode operation.

Features:

All features of Partner Messaging release 6.0 & earlier

The name or extension that a caller is being transferred to is announced when the Directory is used, from the Automated Attendant Service, and from the Voice Mail Service

Provides a system-wide Directory List is automatically created and assigned to Submenu 99 and can be used as a playable directory

Up to 4 customized Directory Lists can be created and assigned to a Submenu and be used as playable customized playable directories.
